

GREG GORMAN

2012 DIGITAL PHOTOGRAPHIC WORKSHOPS

May 13-18 Katrin Eismann, August 12-17 Seth Resnick, August 19-24 Mac Holbert, September 9-14 Andrew Rodney

Experience the beauty of the Northern California Coast while perfecting your digital photographic knowledge with one of the most distinguished photographers of our time, Greg Gorman. Greg, along with another digital expert, will spend the week giving hands-on instruction to each participant while sharing his knowledge of how to see and construct light, both in the intimate setting of his home studio and the picturesque locations of Mendocino. The focus will be on how to communicate with the talent to get that connected portrait. Students will work with Adobe's Lightroom, Photoshop and Epson printers in creating their own original fine art prints.
